

# Northants CALC

## Parish and Town Councils Climate Emergency Action Day

The day will consist of multiple elements:

- An introduction to the climate science, the national and international policy background, and the scale and pace of changes needed
- a positive visioning exercise helping attendees think about a future in which appropriate changes have been made so that their community is zero carbon and resilient
- a series of practical action presentations covering topics such as tree planting, energy efficiency, community engagement and fundraising, including Q&A
- an action planning session, giving attendees a high level climate action plan for their parish or town. This will also be useful for councils that have not yet made a climate emergency declaration, as it will help them produce a more detailed and targeted declaration.

We will also provide advice on how to secure follow-up support and guidance from CSE's Climate Emergency Support Programme.

### **Who should attend?**

Both clerks and councillor

### **Date & Time**
